1. Possibility to authorise the payments by means of several DIGIPASS devices

Expansion of the option of the classical service 'Double signature' (authorisation of documents) for all clients.

Now concurrent authorisation has become available for several digipass devices.

For instance: DIGIPASS No 1 creates the payment, DIGIPASS No 2, DIGIPASS No 3, DIGIPASS_N authorise the document in turns. Until authorisation of the payment by all DIGIPASS devices, the payment is stored in the folder 'Drafts'.

** DIGIPASS - a device for identification of the client and signing of the documents when using the Bank's services remotely. It is an electronic device that generates a unique test key (a combination of numbers that substitutes a signature and seal) for signing of the documents to be sent to the bank.*

2. FastTrack service

By selecting from the menu 'Card Operations' the holders of Mastercard® Platinum and Mastercard® Business Platinum may order coupons for speedy registration at Riga International Airport.

- The coupon is sent to the Client's e-mail as QR code.
- For more information on the FastTrack service [see](#)
